1. Claims 1-19, 21 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite in their definition of component D.2 when the component is the reaction product of D.1 and D.2. The component is used to define the component, rendering the description of the component and therefor the claims, indefinite. It is not clear what applicant intends this aspect of the invention to be.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-7and 11-22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Eckel et al, Patent No. 5,672,645.

Eckel discloses aromatic polycarbonate compositions comprising styrenic polymers commonly recognized as impact modifiers, thermoplastic polymers and a combination of a phosphorous/oxygen compound. No patentable difference is readily ascertained between applicant's claims and the patented invention. See col. 1, line 61 through col. 10, line 51. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kriellion A. Sanders whose telephone number is 571-272-1122. The examiner can normally be reached on Monday through Thursday 6:30-7:00.
